## Cashless systems for Peninsula International School Australia

Here at Peninsula International School Australia, our cashless solution is called as eservice portal. This is all about making catering more accessible and convenient. With a simple payment system that only requires a smartcard, our solutions allow queues at school cafeteria to be significantly cut.

We know that packed lunches very rarely meet the same nutritional standards as school meals, so the more children schools can encourage to use school catering the better – and shorter queues are a good start.

## How parents benefit from cashless systems for schools

A cashless system for parents, easy for parents to pay for school catering, printing, book store, trips and more whenever is convenient for them. They can do it online at own convenient time.

For catering in particular, the cashless system ensures that the school money they are providing to their children is actually being spent where it's intended to be. With this cashless system parents can log in to the online payment portal at any time to top-up their child's account or to view transaction / payment history. Online meal orders & payments are quickly registered on the child's account.

Using pre-order meal system in eservice portal, parents can log in to view the available options for the weeks ahead, and choose the meal for each weekday, or only specific days as required.

Choices made using the online pre-ordering system are sent back to the school's eservice portal, ensuring the chosen pre-order options are saved to the student's account. Any cancelation for pre-order meal must made 24 hours before from eservice portal.
